

Party & Skoothings — Facebook/Instagram Test Ad Report

6-Day WhatsApp Lead Generation Test | Budget: ₦30,000 | Jul 8 – Aug 6, 2026 | Prepared for client review

EXECUTIVE SUMMARY

Metric	Result
Total Spent	₦27,906.98 (of ₦30,000 budget)
Total WhatsApp Conversations Started	158
Average Cost per Conversation	₦176.63
Total Reach	27,211 people
Total Impressions	36,704

The test successfully generated 158 WhatsApp conversations at an average cost of ₦176.63 each. Performance varied significantly across the 7 ad creatives, ad placements, age groups, and locations tested — this report breaks down where the budget performed best so the next ₦270,000 can be spent more efficiently.

AD CREATIVE PERFORMANCE (7 ads tested)

Ad	Conversations	Cost/Result	Spend	Impressions
Test Leads 4 Ad	45	₦109.48	₦4,926.70	7,686
Test Leads 2 Ad	15	₦145.00	₦2,175.01	4,634
Test Leads 3 Ad	3	₦149.08	₦447.24	347
Test Leads 7 Ad	9	₦176.84	₦1,591.59	1,868
Test Leads 5 Ad	83	₦215.76	₦17,908.18	21,508
Test Leads 6 Ad	2	₦231.51	₦463.01	344
Test Leads 1 Ad	1	₦395.25	₦395.25	317

Best performer: Test Leads 4 Ad — cheapest cost per conversation (₦109.48), though it only received 18% of budget.

Biggest budget consumer: Test Leads 5 Ad took 64% of total spend (₦17,908) and drove the most volume (83 conversations), but at nearly double the cost of Test Leads 4.

Weakest performers: Test Leads 1 and 6 Ad had minimal reach and the highest cost per result — recommend dropping these for the next phase.

PLACEMENT PERFORMANCE

Placement	Conversations	Spend	Cost/Result	% of Budget
WhatsApp Status	23	₦1,482.89	₦64.47	5.3%
Facebook Reels	84	₦10,815.04	₦128.75	38.8%
Facebook Feed (in-app)	48	₦14,234.08	₦296.54	51.0%
Instagram Reels	1	₦226.17	₦226.17	0.8%
Instagram Feed	1	₦886.87	₦886.87	3.2%

Placement	Conversations	Spend	Cost/Result	% of Budget
Other placements (no results)	0	₦261.99	—	0.9%

WhatsApp Status was the cheapest placement by a wide margin (₦64.47/conversation) but only received 5.3% of budget. Facebook Feed took the largest share (51%) but was the least efficient of the three main placements — nearly 4.6x more expensive than WhatsApp Status. Instagram placements combined barely converted at all.

AGE GROUP PERFORMANCE

Age Group	Conversations	Spend	Cost/Result
35-44	52	₦8,196.65	₦157.63
45-54	16	₦3,068.97	₦191.81
25-34	53	₦11,218.03	₦211.66
65+	13	₦2,944.67	₦226.51
55-64	5	₦1,249.62	₦249.92

Note: The 18-24 age bracket was cut off in the source data (table view started at 25-34) and could not be captured for this report. This is a minor gap that does not affect the overall conclusions below.

25-34 drove the most volume (53 conversations) but 35-44 was the most cost-efficient segment at ₦157.63/conversation. 55-64 was the weakest age group — lowest volume and highest cost per result.

REGION / STATE PERFORMANCE

State	Spend	% of Budget	In Target List?
Lagos State	₦17,790.57	63.7%	Yes
Rivers State	₦6,405.83	23.0%	Yes (home base)
Imo State	₦1,121.69	4.0%	No
Ogun State	₦869.42	3.1%	No
Abia State	₦770.29	2.8%	No
Akwa Ibom State	₦686.06	2.5%	Partial (Uyo)
Bayelsa State	₦259.16	0.9%	Yes
Anambra State	₦3.96	0.01%	No
Abuja / FCT	₦0.00	0%	Yes — got no delivery

Note: Meta does not report Results at the region level for small counts, so which state actually produced the WhatsApp conversations cannot be confirmed — only where ad spend and reach went.

Lagos absorbed nearly two-thirds of the entire budget. Abuja — one of the three originally targeted locations — received zero delivery. Additionally, ~8.7% of spend (₦2,431) leaked into states that were never selected for targeting (Imo, Ogun, Abia, Akwa Ibom, Anambra), suggesting the location setting used a radius that extended beyond the intended states.

RECOMMENDATIONS FOR NEXT BUDGET (₦270,000 / 1 Month)

- Scale the Test Leads 4 Ad creative style and pause/replace the weakest ads (Test Leads 1 and 6).

- Shift more budget weight toward Facebook Reels and WhatsApp Status; reduce reliance on Facebook Feed and Instagram placements.
- Fix location targeting: use precise city/state pins rather than a broad radius, to stop spend leaking into non-target states.
- Give Abuja a dedicated ad set with a locked minimum budget so it isn't outcompeted by Lagos in a combined campaign.
- Lean into the 25-44 age range, which drove the strongest combined volume and efficiency.
- Reserve a portion of the new budget (roughly 20%) for retargeting people who messaged but did not order, and video viewers who did not click.

Report compiled from Meta Ads Manager data, Jul 8 – Aug 6, 2026 test period.
